Statement on European Union (EU) Registration, Evaluation, Authorization, and Restriction of Chemicals (REACH):

Power Device Corporation (PDC) fully complies with the EU REACH requirements. Our products are designated as “articles” per REACH regulations and substances contained in our “articles” are not intended to be released under normal or reasonable foreseeable conditions of use. These substances are not required to be registered with the European Chemical Agency (ECHA).

Companies that place articles on the EU market are required to notify ECHA for certain conditions:

1. Any substance in the article is a Substance of Very High Concern identified on the Candidate List (last updated January 21, 2025, 247 REACH SVHC's)
2. AND that substance is present in the article in a concentration above 0.1% by weight
3. AND that substance is present in those articles totaling over 1 metric ton per year per producer/importer.

PDC articles **DO NOT** meet the above conditions.

Suppliers of articles are also required to supply to the recipients safe-use information if SVHC's are present above 0.1% by weight, without regard to the 1 metric ton threshold.

PDC concludes that articles deemed lead free or RoHS do not exceed this 0.1% threshold.

Certain articles, not designated as RoHS or Lead free, do contain lead. The lead presents no hazard to humans or the environment under normal handling or use.

For any questions or concerns pertaining to PDC's REACH requirements, please contact our Quality Assurance Department at PDCCustScorecards@powerdevicecorp.com.
